\*\* On a bull we are retaining in herd semen on, we would like the opportunity to use the bull for natural service in one of our breeding seasons if possible, be it mid March and April or August and September. For this sharing of the bull we would be responsible for all trucking costs. We will also care for and winter the bull at no cost to you.

We understand because of long distances and breeding seasons this arrangement may not be possible. It will be your choice, the best interest of the bull will be first and foremost.

The decision does not have to be made sale day, as always we look forward to working with you.
