

EXTRA AGE BULLS

These bulls are born on grass in May and June at our farm near Sangudo. They are fed a silage ration through their first winter. Their performance is off up to 10% compared to the winter born bulls because of the time of year they are born and the management level they are under. The bulls came back to the Spruce Grove Bull Farm in later summer. They have been rigidly screened and are an impressive set of bulls. This is the fourth set of extra age bulls in our bull sale. Customers have been pleased with the amount of cows they will cover plus their ruggedness and durability. We will calf 350 cows this May and June in Sangudo.

Sale Day Wt: _____ Scrotal: _____

EPD's: CE BW WW YW MCE MWWT MILK
-0.4 5.7 50.4 83.5 -1.6 26.1 0.9

-Impressive head and neck extension in this baldy bull.

-Our main source of forage for these May and June born bulls is alfalfa silage, which has contributed to some birth weight at Sangudo.
